

I am a flight attendant and have been now for 7 years. I implore you NOT to let the passengers use their cell phones while in the air. I believe this would pose a huge safety risk. Not only am I concerned with the safety aspect, but come on, we are in a confined area and who the heck wants to listen to someone else's conversation! It's hard enough to get the passengers to listen now, if they were on the phone it would become more difficult. Safety is number one with my airline and the use of cell phones will hinder that!
